Lebanon, Saida

Passionate Web Developer dedicated to creating dynamic and engaging websites. With a strong foundation in HTML, CSS, and JavaScript, I've leveraged my skills to contribute meaningfully to projects that inspire and educate. From an impactful internship at XpertBot to leading personal projects that help students explore web development, I am confident in my ability to craft effective solutions that leave a positive impact. You can explore a selection of my work at https://dev-wonders.netlify.app

- optimizing legacy code
- Meticulous Attention to Details
- building scalable microservices

EDUCATION

Graduate 2025   **MIS**, Lebanese University – Sidon, LB

EXPERIENCE

01/2023 – Present   **Intern**, XpertBot – Estonia (remote)
- gaining valuable hands-on experience in developing responsive and user-friendly websites using ReactJs and tailwindCss.
- Helped in providing bugs free interface for our users with a smooth and fast data delivering.
- Increased API throughput by 20%.
- Acquired practical knowledge in software development best practices, version control, and working in an agile team environment.
- Participated in code reviews, providing feedback and suggestions for improving code quality and readability.

10/2022 – present   **Personal Projects**,
- WebStream:
  An educational website dedicated to web development courses, serving as a launchpad for hundreds of aspiring developers. Through a curated curriculum, hands-on projects, and interactive exercises, WebStream equips students with the skills and knowledge to excel in the web development domain.

- Realify Website (Real Estate):
  Currently under development, the Realify website is poised to
  revolutionize the real estate sector. This platform aims to provide
  potential buyers and renters with an immersive experience of property
  listings. With an emphasis on sleek design and user-friendly
  navigation, Realify will simplify the property search process while
  presenting property details in a visually appealing manner.
